

Description/Applications

It is a phthalate plasticizer specially developed to be used in the formulation of vinyllic floors. It is possible to use it in other applications, subject to technical consulting.

Specifications	Unit	Values
Ester content	% CG	99.0 min.
Mixed Ester	% CG	50.0 a 70.0
Heavy Ester	% CG	20.0 a 30.0
Light Ester	% CG	7.0 a 22.0
Color	Pt / Co	30 max.
Density , 20/4 °C		0.989 – 1.008
Free Acidity	mg KOH / g	0.10 max.
Water	% Weight	0.10 max.

- This product is guaranteed since it is stored and packaged as described below.

Physical Properties	Unit	Values
Flash point	°C	190 a 210
Refractive index, 25 °C		1.482 a 1.490
Viscosity, 25 °C	cP	37 a 55
Physical state		Liquid

- The properties' values above are just for reference, and not to be considered as guaranteed parameters.

PACKAGING :

Bulk : in stainless steel tank cars

STORAGE :

Bulk : in stainless steel, aluminum or strength plastic tank cars, closed and provided with air escapes.
